

### Key to Kibbitzer 67: So - that

1. **A - H** Aspirin is so familiar that many doctors and patients still don't fully recognise its importance
2. **B - G** The predictions are so vague that you can make them fit almost any explanation you care to devise.
3. **C - B** Morale among teachers is so low that many are on the verge of giving up.
4. **D - E** 'Big Science' is now so expensive that governments can no longer shoulder the cost alone.
5. **E - I** Human society is now so complex that what students need is to be taught the "how" rather than the "what" of information.
6. **F - A** Windmills turned so fast in the wind that they caught fire due to friction.
7. **G - J** The mass of brown dwarfs is so small that they never get hot enough to burn hydrogen in their cores, and never become fully fledged stars.
8. **H - F** Heavy-metal pollution in the Vistula is so bad that prudent Warsawians don't drink tap-water even when it's boiled.
9. **I - D** A black hole is a collapsed star whose gravity is so great that nothing can escape it, not even light.
10. **J - C** Over the years he has produced a series of canvases so large that he uses a stepladder to paint them.
